Sounds good. Honestly you have been way more patient with the corps than I would have been. The contracting is taking forever. I am not pushing so hopefully the team and funding stream will catch up with each other. I understand now why mary considers you a good friend. And great fellow fed. Patience does mean a lot.

**Subject:** [EXTERNAL] Upper Animas Draft Generic Site Specific IA SOW & WAF SOW for RI/FS fund-lead activities

Dan – Finally. Attached is a draft SOW for the “umbrella” site-specific generic IA for the Upper Animas River watershed. I’ve also attached a draft SOW for a WAF for fund-lead RI/FS activities. I’m still working on the PRP – oversight WAF but thought I would send you these so that you could provide me comments before I complete the PRP SOW. I have a couple of folks here in Region 8 (*Liz Fagen, RPM working with me on the UA and Robin Coursesn, IA Specialist here in the Region*) reviewing these SOWs also so once I get comments from all, I will make the changes and perhaps at that point I can share with Gary and Chris. I’d like to get this officially in USACE’s hands by the end of April.

Thanks for all your help on getting this work moving forward.

Paula Schmittdiel
